Description			
The FFD library developed by Marlene Hochrieser has to be added to the current working repository. Ideally a download package should be created in the documents section of the page.

question:

- should the FFD module be part of the inVRs/Modules directory or within the external/FFD directory and installed only to the inVRs/Modules directory like the ufo lib?
- what about the ModuleId? -> defined in ModuleIds.h or implicit in the Module itself?

- Yes it should be handled in external, since it is not a part of the core distribution. The installation procedure should be similar to the ufo lib.
- what about the ModuleId? -> defined in ModuleIds.h or implicit in the Module itself?

- The ModuleId cannot be defined in -> ModuleIds.h since it would bind it closer to the core. It should be handled inside the module itself.

notes:

- external ffd library with option for building the sample
- additional inVRsDeformation module, if build within inVRs
- extra inVRsSample in sample directory as standalone app

missing: create wiki page and link attachment:FFD-1.0.zip

#7 - 11/03/2010 11:01 PM - sam g

- Assignee changed from sam g to Christoph Anthes
